

Professional Profile

Xu Na

As a professional researcher with six years of experience in scientific management and research, I have accumulated rich practical and management experience in the fields of sustainable development and environmental protection, and actively participated in international volunteer service projects. I focus on national and corporate crisis management and security-related work, and hope to contribute to society by participating in international scientific research cooperation, and on this basis, deepen scientific research, promote the transformation of results and promote scientific cooperation.

Educational background

Postdoctoral degree in scientific management

PhD in psychology

Master of Business Administration (MBA)

Master of Public Health

Bachelor of Public Service Management

Professional skills

Data analysis: Use Python and R language to analyze data and support decision making.

Research tools: Proficient in using AutoDockTools, Cytoscape, PyCharm, pymol, etc.

Digital construction: Proficient in the management of enterprise information systems, especially

medical system information systems and electronic medical record systems.

Psychological counseling and health management: Possess a psychological counselor certificate and a senior health manager certificate.

Advantages of applying for international experts

Complex scientific research background

During the period from undergraduate to postdoctoral research, I have accumulated rich scientific research capabilities and published many scientific research results, such as "AI-assisted screening and drug design", "Analysis of the impact of green building design on environmental sustainable development", "The impact of environmental pollution on ecosystem service functions and its restoration strategy", etc.

Technical and scientific research capabilities

Proficient in using Python and R languages for data processing and analysis.

Experience in cross-cultural collaboration, and has participated in multiple international public health projects.

Practical experience

Infection quality control research and practice (2019 to present): Investigated and guided the completion of the epidemic prevention layout of isolation wards and isolation hotels in district-level hospitals, and participated in the formulation and modification of national regional infectious disease prevention and control plans.

Leading the research and construction of the regional "medical waste + Internet" platform:

Transform the research into scientific management results that cover more than 400 medical institutions and achieve efficient resource allocation.

Work experience

District-level infection control expert (2019 - present)

Designed the layout of isolation facilities and participated in the formulation of infectious disease prevention and control plans.

Public health project participant (2019 - present)

Participate in international and domestic public health projects and accumulate cross-cultural collaboration experience.

Enterprise management guidance (2024 - present)

Provide professional corporate management guidance services to enterprises, focusing on entrepreneurship guidance, family office guidance and corporate mergers and acquisitions and investment, aiming to create more employment opportunities for the society, help enterprises optimize operating processes, improve efficiency, increase corporate profits, and enhance the sustainable development capabilities of enterprises.

Lifetime editorial board member of the core journals of the Ministry of Science and Education
(2025)

Public Welfare Project Experience

I have been involved in public welfare activities at home and abroad for a long time, focusing on projects related to sustainable community development and crisis management. I have participated in many international public welfare projects, helping communities improve their ability to cope with crises under limited resources, and providing management consulting for enterprises to optimize resource allocation and promote harmonious social development. These experiences have not only accumulated rich experience in international project execution, but also cultivated my ability to promote multi-party collaboration and solve practical problems in complex environments.

Personal expectations

I hope to successfully apply for the status of "International Expert" of the Center for State and Corporate Crisis Management of the Moscow State University School of Management, participate in academic forums, roundtable meetings and other activities, and participate in the review of student papers as a reviewer to further promote the development of related fields.
